

Featured Projects

Columbia Project

This project is located on the Albemarle Sound in Columbia, NC. We designed and manufactured everything on the outside of the house except the siding. We incorporated lights inside of the newel posts on the side porch and the dock. We incorporated rope lighting into the porch rails that gives off just enough light at night. The outside of the porch panels were painted to match the siding and then the scenes were carved into them.

Featured Projects

Mitchell Job

This project is located in Knightdale, NC. We supplied all of the columns, porch valances, porch panels, access doors and a cupola. Raised panel columns and valances were used on the house and matching detached garage.
